STUDY MODULE PROGRAMME (SMP)

Modulo Codo	В	720	В	016	Accredited	2021	06	01	Ren	newal o	date
Module Code	Branch of Science		Progr.	Registr. №.	until	2021	00	01			

Entitlement

Practice I

Prerequisites

Anatomy, Physiology, Pathology, Motor control, Basics of physiotherapy, Clinical kinesiology, First medical aid

Course (module) Learning Outcomes

№.	Learning Outcomes	Teaching / Learning Methods	Assessment Methods			
1	Will be able to read medical records, analyze their data, understand the terms.	Case analysis (Case study), Literature analysis, Practical exercises (tasks), Reflection on action, Seminar	Individual work, Work placement report			
2	Will select and apply appropriate contemporary physiotherapy theories, practice models and methods for the assessment of different patients' functional status and quality of life.	Case analysis (Case study), Literature analysis, Practical exercises (tasks), Reflection on action, Seminar	Individual work, Work placement report			
3	Will be able to define physiotherapy goals.	Case analysis (Case study), Literature analysis, Practical exercises (tasks), Reflection on action, Seminar	Individual work, Work placement report			
4	Will be able to draw up an individual physiotherapy intervention plan/program; to make adjustments if and when required.	Case analysis (Case study), Literature analysis, Practical exercises (tasks), Reflection on action, Seminar	Individual work, Work placement report			
5	Will be able to plan and perform physiotherapy procedures.	Case analysis (Case study), Literature analysis, Practical exercises (tasks), Reflection on action, Seminar	Individual work, Work placement report			
6	Will be able periodically and critically evaluate the effectiveness of physiotherapy intervention.	Case analysis (Case study), Literature analysis, Practical exercises (tasks), Reflection on action, Seminar	Individual work, Work placement report			

Main aim

The aim of the module is to develop a critical clinical reasoning, the ability to communicate with patients, to work independently, the ability to examine the patient and interpret assessment data, to plan and implement physiotherapy procedure, selecting the most effective, science-based methodology.

Summary

Clinical practice is made up of five weeks duration placement period. Teaching includes examination and treatment of patients from the health care institution under the guidance/supervision of a clinical teacher. Clinical teaching is planned with a progression from observation to consideration and independent practice and comprises examination, treatment and rehabilitation, as well as health promotion and prophylaxis.

Level of module

Level	of programme	Cubicat anoun (under the negulation of the ence)
Cycle	Type	Subject group (under the regulation of the area)
First	Bachelor	Bendrojo universitetinio lavinimo

Group under financial classification

9.Reabilitacija ir slauga, sportas (išskyrus trenerius)

Syllabus

№.	Sections and themes	Responsible lecturer
1.	Structure and activities of Health care institutions	1139 asist. Giedrė Jurgelaitienė
2.	Practical learning goals	1139 asist. Giedrė Jurgelaitienė
3.	Physio-therapeutic patient examination	1139 asist. Giedrė Jurgelaitienė
4.	Physio-therapeutic hypothesis and diagnosis	1139 asist. Giedrė Jurgelaitienė
5.	Physiotherapy goals	1139 asist. Giedrė Jurgelaitienė
6.	Physiotherapy program	1139 asist. Giedrė Jurgelaitienė
7.	Evaluation of the effectiveness of treatment and prognosis	1139 asist. Giedrė Jurgelaitienė
8.	Activity of rehabilitation team in patient's treatment	1139 asist. Giedrė Jurgelaitienė

Evaluation procedure of knowledge and abilities:

Ten grade criterion scale is applied. University practice supervisor and enterprise mentor give their own grades for student's practice work, its results presentation and analysis. The final grade is the arithmetic average grade of the grades given by the supervisor and the mentor. The average grade is rounded down up to integer number.
