

**Apply for a completely different study experience**

**The use of environments in physiotherapy  
PHYSIOTHERAPISTS ROLE AT SCHOOL  
Intensive-course May 2020 in PORI, FINLAND**

**Place and time:**

Satakunta University of applied Sciences, May 10<sup>th</sup> - May 17<sup>th</sup>

**ECTS:**

You will get 3 ECTS and the course will replace other planned study activities

**Participants:**

Physiotherapy students from Finland, Sweden, Lithuania, Denmark and Iceland.

**Economy:**

Nordplus network will pay for travel and accommodation based on the receipts

**Language:**

The course will be taught in English

**Social activities** will be arranged during the course

## **When joining the course you will learn:**

1. To emphasize the impact of environment in physiotherapy interventions
2. To deepen the understanding how different environments can be used in physiotherapy to promote equity, health and wellbeing

The course's innovations are to: look at the impacts of the environment; explore the impact of physiotherapists on the environment

At the end of the course you will have deeper understanding of physiotherapists role in different environment, especially working at school with the children

### **Teaching/learning methods**

Contact lessons, digital platform (Teams) and project work in small international groups.

Study visits and practical implementation.

Study guide will be available at the beginning of April 2020
