

## SENDIteach project in Kaunas J. Dobkevičius Progymnasium, 2023 12 21

The SENDIteach team went to the school to disseminate the project results. Primary school teachers were joined by teaching assistants and an administrative staff member. At the beginning, the teachers were introduced to our project survey outcomes derived from both the focus group session and the questionnaire concerning digital competencies and perceived self-efficacy competencies related with inclusive physical education. This was followed by a session in the gym, where the teachers got to know and play games suitable for inclusive PE. After the sessions there was a discussion about what kind of content of the platform would be relevant for teachers and how we as a project could help them. The atmosphere was uplifting, the teachers were curious and the mood was great.
